

Re: 02-278

I am a resident of Indiana and like the Indiana Telephone Privacy Law. It is great sitting down to a quiet meal and not being interrupted by solicitors. The phone calls we now receive are from people we would like to speak with. We were receiving at least 2 calls a day before this Indiana law was passed.(It would probably be more if we were home during the day). If I want to purchase something I like the option of making the call myself, not having someone hound me.

Please do not pass this federal action.
